PROJECTS

Plant Disease Detection using Deep Learning (CNNs)
Technologies: Python, PyTorch, Flask, Convolutional Neural Networks

- Developed a plant disease detection system using CNNs to classify leaf images into 39 categories.
- Trained the model using the Plant Village dataset and deployed it via a Flask web app for real-time predictions.
- Contributed to the open-source project by improving the model and documentation.
- Enabled testing with sample leaf images to validate model accuracy.

EDUCATION

B. Tech in Computer Science and Engineering (CSM)

- Vignan's Institute of Engineering for Women, affiliated to JNTU-GV
- Currently pursuing 4th year | Expected Graduation: 2026
- Percentage: 77.62%

Intermediate (MPC)

- Sri Chaitanya Junior College, Board of Intermediate Education, AP
- Year of Completion: 2022
- Percentage: 96%

Secondary School Certificate (SSC)

- S.F.S School, Board of Secondary Education, AP
- Year of Completion: 2020
- Percentage: 87.67%

CERTIFICATIONS

- Young Professional Edge from TCS ION, [Nov 2023]
- Completed a 2-day workshop at Cyberthreya on the basics of ethical hacking
- Introduction to Natural Language Processing by Great Learning Academy
- SQL (Basic) By Hackerrank

OBJECTIVE

I am a Bachelor of Technology student majoring in Computer Science and Engineering with a focus on Machine Learning. I am looking for an internship or entry-level position where I can apply my knowledge, gain practical experience, and contribute to real-world projects. I have experience with programming, machine learning tools, and problem-solving, and I'm eager to grow and learn in a dynamic environment

LANGUAGES

- English (Fluent)
- Hindi (Proficient/Basic)
- Telugu (Fluent)

SKILLS

Technical Skills:

- Languages: Python (including Data Structures and Algorithms), HTML, CSS (Basic)
- Database: MySQL
- Version Control: Git, GitHub
- Operating Systems: Windows

Soft Skills:

- Problem-Solving
- Communication
- Adaptability
